

Front-end Developer

maxicalderon.dev

ABOUT ME

An Argentinian-Italian self-tought frontend developer with a passion for creating exceptional user experiences. Skilled in problem-solving, attention to detail, and effective communication. A career changer from engineering to development, I bring a unique perspective to my work.

EXPERIENCE

EDUCATION

2010-2016 Universidad Nacional de Cuyo

Bachelor's in Industrial Engineering - Focus on improving and optimizing processes.

8.9/10 GPA

2020 Academia Numen

Full stack web development- MERN Stack

2023

FREELANCING

- Developed a client's blog using TypeScript, Next.js 13, Zod, Tailwind CSS, Cloudinary, Contentful, and Vercel. Implemented webhooks to trigger automatic deployments, edge functions for dynamic OG image generation, and server components.
- Work in progress: Developing an easy-to-use serverless e-commerce solution utilizing TypeScript, Next.js 13, Google Sheets as a database, PapaParse, and the WhatsApp API. The main goal is to provide a tool that assists expats in reaching a larger audience while promoting their products.

2022

PAYTACK Inter - Copenhagen

Worked on a cashback project with React and Styled components, while expanding my Redux skills for global state management and learning i18next for internationalization.

2021

NO COUNTRY

Developed a complete beat website project using React.js, TailwindCSS and Node.js with MongoDB, incorporating email notification and payment gateways.

2020

NEARBY

Co-created and promoted an information management system (mobile app + back office) in collaboration with third-party software suppliers. The system aided authorities during the COVID-19 pandemic, enhancing the vaccination process among other functions.

TECH

Javascript/Typescript/React/Next.js

MongoDB/Firebase/Supabase
